

In the Title

Please restore the title to read:

--Method and Apparatus to Quiesce a Portion of a Simultaneous Multithreaded Central Processing Unit--

REMARKS

Applicants note with appreciation that all pending claims have been allowed. However, the Examiner has unilaterally amended the title. Applicants do not agree with this change and wish to restore the title as originally filed.

MPEP §606.01 requires a new title only where the original title is not descriptive of the invention claimed. The preambles to allowed base Claims 1 and 60 recite that the claimed invention is "[a] method for temporarily halting execution of a thread of control while the thread of control is waiting for an event to occur." Apparatus base claims 31, 49, 50, 58, 61 and 62 each have a similar preamble but are directed to respective systems rather than methods.

Applicants believe that the claimed invention is aptly described by the original title, which covers all of the claimed embodiments, and respectfully request that the original title be restored.

No new matter has been added by this Amendment. Applicants respectfully request entry of this Amendment.

Respectfully submitted,

HAMILTON, BROOK, SMITH & REYNOLDS, P.C.
